

SOLO SAATHI CIRCLE

PRODUCT SPECIFICATION DOCUMENT

Every feature, every rule, in one reference

Kritz Vyonera AI Private Limited
Product: Solo Saathi Circle

1. Product Overview

Solo Saathi Circle solves a specific problem: people who want to attend Navratri/Garba events alone — because friends cancelled, or they're new to the city, or they simply don't have a group — either don't go or go and stand at the edge of the crowd all night. The product matches solo attendees into evenly sized, gender-balanced “Circles” with a volunteer Captain, before or as they arrive.

Two ways to register feed the same matching system:

- Live (walk-up, matched instantly at the venue) and
- Advance (pre-booked, matched in a batch ahead of the event).

The product also gives event organizers a paid “Certified” partnership offering, described briefly in Section 7.

2. Who Uses This

Persona	What they need
Solo attendee, spontaneous	Show up at a venue tonight and get matched immediately (Live)
Solo attendee, planner	Lock in a group before the night, especially for a specific date (Advance)
Captain (volunteer)	Lead the icebreaker, headcount, and flag issues — without any enforcement power
Event organizer	See aggregate solo-attendee data and offer a visible trust badge, without managing anything themselves

3. Feature Area — Registration & Matching

► Live Registration

Walk-up registration at the venue, matched into a Circle instantly.

- Fields: ticket serial or photo, name, WhatsApp number, city, venue, gender, age band, all-women toggle, Captain opt-in, skill level
- Gated to the live event season (opens Oct 13) AND a daily window of 6:30 PM–1:30 AM
- Geolocation auto-detects the venue on the main button tap, with a confirm-and-override step if it disagrees with the manual pick
- Requires a verified WhatsApp number before completing (see OTP Verification below)

► Advance Registration

Pre-event registration for a specific future date, pooled with others and matched in a batch rather than instantly.

- Same core fields, plus a mandatory ticket photo (no serial-only option) and a required event-date picker
- Stays open through the day of the event — NOT a hard 48-hour registration cutoff
- Separately, a 48-hour group-formation promise: attendees are told their group by 48 hours before the event, even if the group ends up smaller than usual
- Framed positively — attendees are told they can still show up and dance live even if their pre-booked group is small

► OTP Verification

Confirms a registrant controls the WhatsApp number they enter, before either registration path can complete.

- Primary: WhatsApp; Fallback: SMS if WhatsApp delivery fails
- Hard block by design: after repeated wrong codes, that number simply cannot register — no manual override. This exists specifically to stop people registering on a number they don't own and later disputing or claiming a refund

► AI Ticket Verification

Reads an uploaded ticket photo to extract city, venue, and a plausibility check, regardless of which platform (BookMyShow, District, a custom pass) issued it.

- Mandatory for Advance registration; optional (serial OR photo) for Live, since physical presence already provides some fraud signal
- Cross-checks the extracted venue against the manually-selected one and warns on a mismatch

► The Matching Algorithm

Decides who ends up in which Circle, applying the same rules whether matching happens instantly (Live) or in a batch (Advance).

- Circles are named {LEVEL-PREFIX}-{number}: GARBA (Beginner), TAAL (Intermediate), RAAS (Advanced), SAKHI (all-women, any level) Other Name Options: TOLI, DHOL, DHAKLA, TARANG, MANDLI.
- Gender balance: no more than 10 people of one declared gender in a mixed circle; unstated gender never counts toward this
- All-women circles bypass the gender cap entirely; a floor of 4 is preferred before closing one, with 3 as an absolute last resort — a soft target, not a hard block
- No hard ceiling on circle size, but a soft maximum of 24 starts a fresh circle to avoid unbounded growth
- The Group matching priority is:
 1. City & Venue
 2. Gender & Age ration
 3. Skill level –
 - a. Stand-alone Skill – Algorithm to first Group as per Skill level – Beginner, Intermediate & Pro
 - b. If the numbers aren't pulling up - Combination always to go with [Beginner + Intermediate] & [Intermediate + Pro]

► Pricing

A flat registration fee, the same for Live and Advance.

- ₹199 on standard dates, ₹249 on configured peak dates (e.g. weekends, Ashtami)
- Allow the admins to change the pricing per venue & date or give discount
- Allow for Coupon code- Discount mechanism

4. Feature Area — The Event Night Experience

► Beacon

A capped-rate pulsing light (not a true strobe) attendees can activate on their phone to help their Circle spot them in a crowd.

- Default pulse ~2.2 seconds, with a faster 0.6-second option
- For Every group, assign different color code or randomly system select.

► Circle Chat

Free-form group chat for a Circle, open to text and quick-tap suggestion chips.

- A profanity filter masks flagged words with asterisks and shows a gentle nudge, rather than blocking the message
- A separate spam/ad-pattern detector (links, phone numbers, promo keywords) blocks the message outright and applies a 60-second cooldown
- A Report button on any message flags it to a volunteer — it does not auto-remove anything
- Chat and the Circle itself fully disappear (not read-only) at 1:00 AM, with advance notice shown when chat opens

► Grow / Lock

Lets any Circle member open the group to more people or close it to new joiners, resolved once per chat session.

- Growing opens 1-20 more spots and unlocks the circle if it was locked
- Locking closes it to new members immediately

► Leave Group

Any member can leave at any time, freeing their slot for someone else to join — available in both Live and Advance/pre-live chat.

► Captain Role

An opt-in, first-come volunteer role within each Circle.

- Locked responsibilities: break the ice, take a headcount, and flag any concerning behavior to an on-ground volunteer
- Explicitly NOT an enforcement role — a Captain cannot control music or eject anyone
- Transfer Captainship: the current Captain can hand the role to anyone in the roster, with a Cancel option to back out without transferring
- If no-one in the group has selected to be Captain, then system auto-selects, someone from the group

► Switch Circle

Lets someone move to a different Circle if their current one isn't the right fit.

- Capped at 3 switches per night
- Locked for the first 5 minutes after joining a Circle, then a 20-minute cooldown between further switches

► Safety Features

SOS and identity verification, always available regardless of chat state.

- SOS opens a pre-filled WhatsApp message to a safety contact number
- An offline QR verification pass lets a member confirm to another member that they're genuinely matched into the same Circle, without needing network connectivity

5. Feature Area — Find My Circle

A lookup, by WhatsApp number, of every night someone has registered — not just the most recent.

- Shows every past, current and Future registration with a date label (or an “Advance Registration” tag for a not-yet-finalized booking)
- Only today's / currently-live entry gets full Beacon and Chat access; past nights show read-only details plus that night's own QR/token — Beacon and Chat are correctly withheld once a night has passed
- For Future they should be able to view their registrations & QR Code

6. Feature Area — Notifications

Simulated in the prototype, designed for real WhatsApp delivery in production. Four moments:

- Group formed — sent the moment an Advance pool finalizes into a real Circle
- Day-before reminder — resends group and landmark info
- Day-of reminder — same info again, timed for the morning of
- Post-event show/no-show — a simple yes/no prompt, feeding the Organizer Dashboard's show-up rate

7. Feature Area — Organizer Tools

► Organizer Dashboard

A read-only, venue-scoped view of aggregate solo-attendee data — built specifically to give organizers a segment they can't see anywhere else.

- Login is Venue ID + Password only — deliberately does not expose a list of other venues
- Shows totals, Advance-vs-Live split, skill-level breakdown, gender balance, circles formed, all-women circle count, and show-up rate
- Explicitly never shows money, names, or phone numbers

Solo-Saathi Certified is the paid partnership layer for organizers — on-ground booth, volunteers, branding, and this same analytics report, sold in tiers (covered in the Business Model & Partner Media Kit documents, not detailed here since it's a commercial offering layered on top of the product rather than a feature of it).

8. Trust & Safety Principles

- 18+ only, enforced at registration alongside Terms & Conditions acceptance
- Non-refundable, non-transferable registration — the same policy as a standard movie ticket, applied consistently to both Live and Advance
- No individual attendee data is ever shared with an organizer — only aggregate counts

9. Consolidated Business Rules — Quick Reference

Rule	Value
Gender cap (mixed circles)	Max 10 of one declared gender
All-women circle floor	4 preferred, 3 absolute minimum (soft target)
Soft max circle size	24, before a new circle starts
Live season start	October 13
Live daily window	6:30 PM – 1:30 AM
Chat auto-close	1:00 AM
Switch Circle limit	3 per night
Switch Circle cooldowns	5 min after joining, then 20 min between switches
OTP expiry	10 minutes

OTP max verify attempts	5, then hard-blocked pending a new code
OTP resend limits	30-second cooldown, 3 sends per 15 minutes
Registration price	₹199 standard / ₹249 peak
Advance registration window	Open through day-of; NOT a 48h cutoff
Group-formation promise	Notified by 48h before the event, at the latest
